Comment for planning application WSCC/011/21

Application number	WSCC/011/21
Name	Jonathan Harris
Address	8 Trenchard Close, Wallingford, Oxford, OX10 9BA
Type of Comment	Objection
Comments	I'm objecting to this proposal due to traffic impact, the figures quoted are not accurate, the roads around area are already busy and more HGV's will only add to the problem. Emissions, what is the actual impact of just burning waste rather than invest more in proper recycling like other countries. Proximity, this building will be very close to existing developments and near to the site of 1500 homes. Seem's that Grundon have asked all their employees to support this application many who do not even live in the area so not really sure how their comments can be counted ? So I'm strongly objecting to this development
