Objection

I wish to object most strongly to the proposed enlarged Grundon Viridor incinerator on Ford Airfield. The height and size of this vast building is a desecration to the coastal plain, the beautiful Arun Valley and the views from the South Downs National Park. I am appalled that the two large chimneys proposed will be slightly higher than Chichester Cathedral which can be seen for miles around from every direction. Of even more concern is the risk to public health in what is becoming an extremely densely populated area. Depending on the wind direction any number of the community for miles around are going to be effected by the noxious emissions that will be generated and dispersed from the two huge chimneys. An incinerator of this size also risks the deliverability of one of Arun District Council's key strategic sites for 1,500 new homes and a primary and secondary school. It would be madness to build new homes anywhere near to this health risk. Air quality will be further damaged with the additional HGV vehicle movements required to feed this monstrosity. The surrounding infrastructure is not sufficient to cope with the current volume of traffic let alone the envisaged additional 77% increase along Ford Road. Incineration of rubbish is not the 'Green Way' to produce energy, producing more CO2 than coal and oil generated electricity combined it will do nothing but harm in the fight against global warming. I trust WSCC planning will make the right decision and turn down this application in its entirety.
