Objection

I wish to object most strongly to this proposal for the following reasons. - An incinerator of this size - 27 acres - will add to air pollution to an unacceptable degree. Emissions include dioxins, NO2 and ultra fine particulate matter which is harmful to humans and the natural environment. - The proximity to the South Downs National Park, and the effect it will have on views from the park. - It will impact the historical character of Arundel. - As part of the acknowledgement of climate change, and the need to reduce greenhouse gas emissions, we will be putting greater efforts into REDUCTING waste. Waste, and our treatment of it, is a major contributor to CO2 emissions. We should be on the path of waste reduction, not give permission to continue waste production by providing the facility to deal with yet more. - The energy produced is not Green, as it produces more CO2 than coal and oil generated electricity combined - I am concerned about the inevitable increase in heavy traffic, and the air pollution that will result. - This project is not in keeping with the area, and will blight our beautiful Arun Valley.
