Objection

I strongly object to this application for the following reasons. Ford is not a suitable location for this massive incinerator. The area is a key site in Arun District Council's Local Plan with an allocation of 1500 more houses. Homes should not be adjacent to industrial buildings of this scale that will be working 24 hours a day, 7 days a week and producing potentially toxic emissions including CO2. The road need network around the site is not suitable for the large HGV traffic that the operation will generate, 240 journeys per day. If this type of facility has to be built they should be adjacent to major roads with 360 degree capture area, not near to the coast. The Climping gap, including Climping Beach SSSI, is the largest open area of coast between Bognor Regis and Brighton. The beautiful views from Arundel and South Downs National Park would be severely spoilt by the massive building. The UK and West Sussex County Council have set ambitious "Net Zero" carbon targets. Building Energy from Waste plants (the new name for incinerators) goes completely in the other direction, increasing CO2 emissions. WSCC should be helping residents reduce waste. It should also ensure that all materials collected for recycling are recycled and not burnt in incinerators. WSCC should publish the amount recycled as well as collected. Make sure 53% is 53%!!! Please refuse this application and do not allow this outdated climate-damaging monster to be built in the Arun Valley.
