| Comments              | I believe these plans will cause 2 major negative consequences for Ford and Arundel. Having such a structure exhaust waste gases into the air in a heavily green area could cause environmental issues and also travel directly towards Arundel; an already green oriented town with many residents living there for that purpose alone. The second major consequence would be a possible exponential increase in traffic. We will see increasing number of HGV sized vehicles using the main Ford road from both the A27 at Arundel and from the A259 at Climping. This coupled with the major pinch points at Arundel and also the Ford train station gates would cause heavy delays on a permanent basis. Also to consider are the plans to build more housing next to Priory Road and the increased traffic generated as such. People will not be able to travel easily if the bulk of traffic through Ford is service vehicle related to the new waste facility. I, along with many other local residents would strongly suggest a reconsideration of these plans. |
