Objection

This facility is planned to be far too close to housing in Clymping, Ford and Yapton. The access to this site is a narrow, single carriageway unclassified road. The local roads cannot cope with the existing traffic let alone the additional usage from the new housing as well as the additional 240-440 lorries a day! These extra lorries will bring noise 24hrs a day along with the pollution they produce. With housing being so close by the emissions are of real concern as it will create noxious fumes which will effect the health of the local people. Our grandchildren will be growing up with all this additional pollution on their doorstep. There are much cleaner ways to create energy. It is not needed to deal with waste from West Sussex - in fact the waste will be being imported into the county for disposal. This site will also have a huge impact on the views for miles around, including from the Southdowns
