Dear W.S.C.C.

I strongly object to this incinerator being built it looks so huge and if we need it, it should be built nowhere near homes but right out of the way. But you say it is not needed so why build it here!

lets have the schools here they are most needed.

I do hope that even more things can be recycled, that's most important  
NO MORE CHIMNEYS!

Thank you

(MRS.)

P.T.O.

Please could we have our  
powerments re surfaced as  
our end (WINDHILL END) is so  
bad they are all breaking up  
and very uncomfortable and  
dangerous to walk on.

Thank you.

Glen King Fire (85) I have  
lived here 33 years and they  
must never been done in all  
that time. Also I do think  
there should be a proper pavement  
leading up to the H27 as it is  
dangerous for people with prams  
& disabled and anyone walking  
to the station  
Thanking you

PLEASE PASS ON!
