Dear Sirs,

I wish to lodge an objection<sup>to</sup> the building of an incinerator and its two towers in planning application WSCC/011/21 for two main reasons.

1. Emissions of toxic matter which will be detrimental to the environment, both for humans and animals and will increase the escalation of climate change, which is a threat to the whole of our planet and future generations.
2. The work required will inevitably increase the volume of traffic along Ford Road, Arundel, which is already very congested. Most of the additional traffic will be HGV'S which at the moment totally ignore the notice at the roundabout at the top end of Ford Road off the A27, which clearly states "Not suitable for HGV'S".

I have also written to Arun District Council Planning Dept., at Littlehampton to object to their proposal to build 90 houses off the Ford Road with no provision of the necessary infra-structure or increased medical facilities.

Yours faithfully,
