Dear Sir,

Concerning the above for an incinerator at Ford. I would like to object most strongly to this development.

It is not needed and would be very harmful to the environment. Zero carbon clean wind and solar energy contribute more than 50% to the energy needs of the U.K and this is increasing all the time. Why would permission be given for such a harmful development ? PLEASE refuse permission.

I am over 80 years old and the thought of what it could do to the environment for my and many other people's grandchildren is very worrying.

Yours sincerely,

David Pearson.
