Subject: Objection to incinerator at Ford - air quality and suitability to local area
Date: 13 May 2021 18:24:37

Hi.

As a local resident I'm truly anxious and worried for my families health and breathing if this incinerator is build as planned at Ford.

I have 2 very young children and whole heartedly reject the notion that they should be subjected to reduced air quality, with increased noise and traffic pollution. Just for a commercial profit.

I also say this is not at all suitable for the area, with local buildings as comparison it is oversized causing a visual eye sore and ruining the essence of a "protected wildlife area".

If Ford parish and local councils let tgis go ahead they will be failing local residents on many levels, prioritising corporate profit, over the quality of life for local residents.

I ask for full disclosure as to any financial gain for local authorities should this scheme be given the go ahead?

Regards
Duncan Harvey
