Subject: OBJECTION to planning application WSCC/011/21
Date: 15 May 2021 12:58:49

As per my objection (included below) to the previous planning application for the Arun Valley Rubbish Incinerator, I find it farcical that we are again in this situation especially after the public inquiry into Ella Adoo-Kissi-Debrah's untimely death as a result of living near a busy road.

Despite all the above, West Sussex Council is again considering allowing an increase of 77% in HGV traffic along Ford Road, the road is already clearly signposted and designated unsuitable for HGV movements. This unsuitability is yet to be enforced by the West Sussex Council or West Sussex police.

Therefore, I strongly OBJECT to the planning application WSCC/011/21 and hope that West Sussex Council will instead build a greener and safer environment with less HGV traffic and more cycling and walking lanes, and better public transport which will improve and protect what we already have without endangering the environment, ecosystem and lives further.

All the best

Thank you for submitting comments online for the following planning application:

Application number: WSCC/036/20

Site: Ford Circular Technology Park, Ford Road, Ford, Arundel BN18 0XL

Proposal: Demolition of existing buildings and structures and construction and operation of an energy recovery facility and a waste sorting and transfer facility for treatment of municipal, commercial and industrial wastes, including ancillary buildings, structures, parking, hardstanding and landscape works

Your comments:

My family and I live on Ford Road which is an area already not suitable for HGVs despite the copious that seem to pass through anyway. The idea of more HGVs coming through to access the planned incinerator seems shocking. What we don't need is a pollutant, especially not in the South Downs. What we do need in this area is more pedestrian paths and cycle lanes and someone or something to enforce the prevention of HGVs coming down this already small residential road. We have children accessing two schools in the town from this area with no pedestrian crossing and an old people's home which seems like it'd be in danger and a surgery that requires those in town to cross Ford road

to get there. On top of that, an increase in traffic could block the fire station too, a service that I'm sure you would agree absolutely needs complete access to wherever it needs to be. With the mix of a lot of children and old people in the area, a pollutant which could potentially cause plenty of medical issues, from something like asthma all the way to cancer, seems irresponsible, it simply doesn't make sense. Furthermore, our local surgery wouldn't be able to cope with such an increase in health issues as it is already stretched to its limit.

I sincerely hope that someone will consider all of this and take the responsible decision of stopping this plan. There's already a planned housing development very near the planned incinerator which just seems like a terrible combination.

Therefore, as a mother of two children and a resident of this beautiful town and area, of which we are all very proud of, I hope these comments will help you to make the right decision.

Thank you in advance,
Marina Biancardi

You can keep up to date on this planning application online at:
