Dear Sirs

Which came first...the chicken or the egg....planning for 1,500 houses plus schools, or a Noxious Incinerator ??

It is incomprehensible that the Planning Departments in West Sussex County Council do not communicate with each other.

Much needed housing and facilities....yes, by all means. But an incinerator disgorging noxious fumes, harmful to human health so near a housing estate....this is crazy !

Despite being an eyesore in this beautiful environment, this development would cause too much HGV traffic on an inadequate road...and more noxious fumes.

Please think again. And, communicate within the Council !
