Granary House

The Street Warningcamp BN18 9QT

Application number: WSCC/011/21

Site: Ford Circular Technology Park, Ford Road, Ford BN18 0XL

Proposal: Demolition of existing buildings and structures and construction and operation of an energy recovery facility and a waste sorting and transfer facility for treatment of municipal, commercial and industrial wastes, including ancillary buildings, structures, parking, hardstanding, and landscape works

We strongly object to building of the Arun Rubbish Incinerator for the following reasons:-

- * it is not green energy that will be incinerated and can produce emissions that could prove harmful
- * the local roads would not be able to sustain the size and weight of HGVs to and from the site

- * air quality will be impacted

- * the location is not the ideal setting for such a structure, with its close proximity to the South Downs National Park, the building and particularly the chimney would be visible and intrusive from a great distance

Also - in view of the extensive plans for new houses in and around the Ford area, it's possible a waste plant may have an adverse effect on peoples health..This would be a concern for families with young children and the elderly.
