Dear Sirs,

I wish to strenuously object to this application for waste disposal on Ford Aerodrome . I agree with principal that each district/county should be responsible for its own waste. We in West Sussex already have an adequate waste plant at Horsham and should not pollute our environment by importing and incinerating everybody else's waste at Ford. Every time we are told there will not be any smell or pollution it turns out to be wrong but by then it is too late. Why would 85m chimneys be required unless it is to disperse the pollution more widely. Please do not be steamrolled into accepting something that is to the detriment of this beautiful county.

Yours sincerely
Keith Langmead
