Dear Sir / Madam,

Please take this email as an objection to the proposed construction of an incinerator in the Ford area.

I object for many reasons, however the main reason I am objecting is that it is not know, but is thought likely, that incinerators of this type have caused birth defects in children born in the local area to any previous incinerators.

Why the council would want to put unborn children at risk of birth defects is something I cannot comprehend.

An incinerator should be located well away from the local population in a remote area where it is unlikely to cause harm to any local residents.

Regards

Victoria Jones
