

# INCINERATOR

## FORD AIR FIELD

### SIGHTS, SOUNDS AND SMELLS

- Noise
- Smells
- Litter
- Increased Vehicle Traffic
- Air Pollution

- Are you against the proposed building of the incinerator on Ford Airfield?
- The building will be seen from many of our properties!

### AIR POLLUTION

Up until now incinerator emissions have been limited by EU standards, which the industry and the UK government has looked to weaken. From next year they will be decided domestically.

### HOUSE PRICES

Are you concerned about how this proposed incinerator and it's negative effects might affect house prices?

If you are against this, please write your name, house number and any comments you have and pop this back through my door at number 8, today or before noon on Thursday 13<sup>th</sup> of May.

Due to my situation (being Deaf and other disability challenges), our newly re-elected Councillor will be visiting me at my house on Thursday 13<sup>th</sup> of May, in the afternoon.

Thank you!

Diana Marangos  
8 Wooldridge Walk

*Positive Peter Coston 26 Wooldridge*

*We object for the reasons listed in this leaflet and so that the interests of the development be made known to a wider group of Hampshire residents as they will need to be affected.*
