Comment for planning application WSCC/011/21

Application number	WSCC/011/21
Name	Miss Elaine Lowin
Address	1 Neptune Way, Meadow Gardens, Yapton
Type of Comment	Objection
Comments	The additional information supplied does not in any way make this a viable proposition. We are still dealing with increased HGV traffic along unsuitable roads, air pollution regardless of the 'window dressing' information provided, an unsightly building that will continue to be visible above any fencing or trees planted (the building will rise way above anything they will erect or plant) and it will be still be seen for miles therefore detrimentally affecting the current attractiveness of our surrounding countryside. How can chimneys that are higher than Chichester cathedral be placed on our doorstep and for that to be considered as ok?
	I still fail to understand why WSCC are even giving this proposal consideration as they have already approved 5000 new homes (and community services) that will hug this monstrosity and therefore will put this approved project in jeopardy. No-one will want to live next door to this and existing residents risk a reduction in the value of their homes as a result. Put a stop to this now and consider a more appropriate site that is not situated in a rural location.
