I object to this Application on the simple basis that the Town of Arundel is directly South West of this site. The prevailing wind for the United Kingdom is and always will be South West. The Residual Fumes and Smoke from the Unit will give the Inhabitants Cancer. There is no relevant research to prove that this is not True. As the "Honeypot" of the South East of England Tourist Locations with over 500,000 Tourists Visitors per annum, all of whom will be exposed to the Contamination generated by this unnecessary operation
