Subject: Environmental Assessment Ford incinerator application

Dear [REDACTED]

I have made my comments on this application more than once and would request that they be taken into consideration in this environmental assessment also.

It is not acceptable that objectors are being expected to keep on repeating their objections over and over again. It feels as if we are being deliberately worn down.

Most objections do concern environment issues anyway....the whole plan is an environment disaster for Ford, Clymping and its environs.

I trust that all my objections will be put forward and duly considered by the planning committee.

Best regards
Lesley Lovell
