Type of Comment	<input type="text" value="Objection"/>
Comments	<input type="text" value="Nature must be protected and the proposal to build a quarry, by its own admission, destroys the natural environment. In addition the massive increase in the volume of diesel powered 32 tonne HGVs being driven on rural roads will increase pollution and cause serious disturbance. There is no demand for this development, it destroys nature and reduces the welfare of local wildlife, residents and visitors, so therefore the application should be rejected."/>
