Objection

Loxwood has had so much disruption and ongoing building for the past 10 years, to counter balance the green field sites being built upon and to offer the many 100's more new residents access the countryside, the woods MUST remain as they are.

The woods are ancient and provide a habitat for so many hundreds of insects, amphibians and mammals, let alone providing glorious scenery and natural escapism, peacefulness and tranquility in clean air for all that walk in there.

Through lockdown you saw so many 'new' people who had never walked there before get to walk in and around the woods to enjoy the natural beauty and all the charm it has to offer - how can this be taken away? It is so good for mental health, nature and the environment.

The local clay/tile/brick companies have stated they do not require anymore clay, they have surplus material from their current providers, so who, what and why are you planning on digging this up for!? The bluebells and wild garlic in spring are a phenomenon, and one that takes centuries to generate, how can this be destroyed?

I fully oppose this application.
