Comments	<input type="text" value="I object to the destruction of wealden woodland habitat to create a clay quarry and waste land-fill disposal facility. The area is a valuable managed woodland environment and is a popular public amenity woodland attraction. The proposed development would cause significant damage to the environment with truck and plant noise, ugly views and pollution to the atmosphere and water table. The surrounding area is already under pressure with housing developments in Loxwood , Alfold and Dunsfold; the additional heavy traffic on the local country roads would materially increase traffic hazards and damage road surface and kerbs. It would raise local noise and and air pollution."/>
