estimated 40 HGV lorries per day and then exiting out on to the already extremely busy and overburdened A281, which is facing excessive demands from other recent developments in the surrounding area, would be disastrous. Access on to the proposed site via the Lay-by which is used by the general public for parking will be hugely impacted and people will end up parking on the Loxwood Road which will result in dangerou conditions throughout the day. In addition to this there will be HGV's waiting to access the site on what is already a dangerous bend with limited visibility.	ite oe us
