

Comment for planning application WSCC/030/21

Application number	<input type="text" value="WSCC/030/21"/>
Name	<input type="text" value="Julie Sayers"/>
Address	<input type="text" value="THE CHERRIES, LOXWOOD ROAD, LOXWOOD ROAD, HORSHAM, RH12 3DW"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<input type="text" value="Loxwood Road is quiet country road, the increase in traffic due to this development will have a hugely detrimental impact on the quiet rural area and increased risk to other road users, pedestrians, runners, cyclists and motorists. The noise pollution will be significant due to the increase in HGV lorries and wheel wash making this a totally unsuitable area for this development. The area is currently a peaceful and quiet area with minimal noise pollution and no light pollution, the development will destroy this peaceful haven for people and wildlife alike and thus impact the wellbeing significantly of those who live and walk in this area. The project will have a devastating impact on the environment affecting irreplaceable ancient woodland, impacting wildlife and habitats including bats that are classified as a priority species. It will also increase the net carbon emissions due to removal of trees and disturbing the woodland floor as well as burning fossil fuels. Looking at the need for this development there is no need. There is no demand for brick making clay and WSCC have 25 years worth of reserves. So the destruction of tranquil place will serve no useful purpose and bring no benefit to the local community. The lay-by where access is proposed is a busy parking area for the general public who walk in the woods and the development will reduce the amenity for the general public thus causing a significant road safety risk. I can see no possible reason why this development should go ahead."/>
