Almost everything I have read about this proposal points to it being likely to damage the health and safety of the people who live and work locally and travel through the quite narrow winding roads and lanes around here.

Clearly it would have a significant negative impact on the environment and wild life and its habitat in and around the site and I can see no justification for it.

I have experienced the noise, dirt and dust generated on and around a waste site by machinery and heavy vehicles and it really does adversely affect enjoyment of your home and your health and wellbeing.

Road safety would undoubtedly be affected by the big increase in traffic.
