My son and his family live in Tismans Common and it is a lovely part of the world . I love visiting them just for the peacefulness of the area as opposed to where I live . I am horrified to understand you want to destroy this ancient woodland for this purpose . In these days when climate change is to the fore surely we need to keep this woodland and all its habitat wildlife . I assume you know how narrow the roads are around this area and the thought of huge lorries going back and forth several times an hour fills me with dread. How many horses and riders will be run down, plus children coming and going to school, plus dog walkers as my family. In my view it's an accident waiting to happen. I always drive very slowly down these narrow roads which are not the best well maintained, as I would hate to not be able to get out of the way of any oncoming traffic etc. Plus this "clay pit" with its recycling will be noisy and dirty. Why spoil such a beautiful part of the country for something so alien. It breaks my heart to think of this part of the country and ancient woodland being ripped apart for a commercial venture.

Surely a brownfield site would be a better proposition. This country is ,I feel, being run into the ground when money is the only God that matters. Isn't it time to think about it's beauty, it's people, the climate change and stop this abboration from going ahead..
