| Comments | As well as destroying an area of ancient woodland, this development will introduce a dangerous amount of heavy goods vehicle traffic using small winding country roads which are not safe for this type of traffic. I have lived in Rudgwick for 21 years and have raised a family here. We regularly use the road from Rudgwick and it is frequently used by cyclists, pedestrians and horse riders as well as local traffic. Because of the winding nature of the roads, visibility is at times restricted and it would be devastatingly dangerous for other road users when large construction vehicles and lorries use the route. This proposed site should be reconsidered somewhere with a more suitable access infrastructure. | |
