Comments	<input type="text" value="This is a totally unsuitable and unnecessary site for waste disposal , causing disruption and danger to road users in a time when environmental issues are at the forefront of everyone`s concern. Surely , there are enough such sites already situated in West Sussex ! This will be a disaster for local farmland, woodlands school, and footpath closure, While causing these problems , to name but a few,Traffic noise, dust pollution, parking and danger to road users and pedestrians these plans would not bring any benefits to the local area, but they would have to endure, for some , the rest of their lives. It is very difficult to see any benefits to this proposal, just massive environmental issues"/>
