The size and nature of this proposed operation is inappropriate for our small rural community, providing recreational benefits for the area as well as conservation of ancient woodland and its wildlife. Our country lanes are unsuitable for the proposed heavy and large vehicle use which would present a danger to pedestrians, cyclists, horse riders - of which there are many. There are too many fatal accidents as it is. Also the roads are in poor enough condition as they are, and potholes create a further cause of accidents. Visibility on these country lanes is poor.

The impact on the enjoyment of our rural area would be seriously compromised by this activity, which would be far better located near a major roadway connection. The proposed industrial waste burial is wholly inappropriate for this area.
