

Comment for planning application WSCC/030/21

Application number	WSCC/030/21
Name	Deborah McCracken
Address	CHALMINGTON, TISMANS COMMON, TISMANS COMMON, HORSHAM, RH12 3DY
Type of Comment	Objection
Comments	<p>This is a greenfield site which according to the National policy should not be used for waste sites. The proposed area is in the middle of an area with many footpaths and established right of way which would cause many safety issues for walkers.</p> <p>There is a proposed 'temporary' footpath closure no.792-1. Temporary in this case would be 33 years! There is a 25 year supply of clay in at least 3 pits and 24 year supply in another therefore the national and local level clay requirements are met.</p> <p>The natural habitat for many species of animals will be eradicated and four threatened species of bats have been found to live in the trees on this site.</p> <p>It will have major devastating impact on all creatures that live here.</p> <p>The impact on the roads will be immense. Already the narrow roads around this site are dangerous at times. Horses, cyclists and all vehicle users lives will be put at risk because of the size and frequency of the proposed traffic.</p> <p>This is a beautiful tranquil area of natural beauty with many different species of wildlife. It is very well used by many people every day who enjoy walking through these woods and appreciate everything about them.</p> <p>If this is allowed to go ahead it will cause huge disruption, pollution and untold safety issues for everyone around.</p> <p>I am also aware that last year in Dec 2020 West Sussex County Council introduced a tree plan with one of its aims to protect trees and woodlands from new developments and other threats. If this application were to be granted this would be in direct opposition to the councils own policy .</p>
