

Comment for planning application WSCC/030/21

Application number	<input type="text" value="WSCC/030/21"/>
Name	<input type="text" value="Greg McCourt"/>
Address	<input type="text" value="14 SWEETERS FIELD ROAD Alfold, Cranleigh, Surrey. GU6 8UD"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>This application does nothing to support the local economy nor environment. In fact it detracts at every level.</p> <p>Increased heavy traffic along small country roads, will add to increased repairs, see greater potential for accidents with local amenity users, such as cyclists, horse-riders as well as cars. Increased road usage is already anticipated with increased levels of housing developments planned in the area, without supporting infrastructure.</p> <p>The industry needs no further expansion and the recycling plans appear disorganised with unnecessary extra road journeys leading to an increase in diesel pollution in an otherwise greenbelt area.</p> <p>If granted the adverse effects will go far beyond the 300 acres of the site, with pollution levels increasing, a loss of local amenity and destruction of a woodland area, for financial corporate gain, without consideration of local environmental issues,</p>
