Objection

I am objecting to building a commercial waste recycling plant and clay pits plan on the greenfield site. The proposed development will increase HGV moments on the local roads which are not designed for this type of vehicles (Loxwood Road is circa 6 meter wide) and the increased volume of traffic in this rural area will cause a severe safety risk to other road users. I am also opposing the plans to close the popular footpath which runs alongside the site to enable HGV's access to the plant. The proposed development does not protect or enhance the rural character of the area but rather the opposite, it will contribute to an increase in net carbon emission and will have an irreversible impact on local wildlife habitat and landscape.
