Type of OI Comment	bjection	
no the co inf po clc me	I object to this application as a result of the increase in traffic through Rudgwick which will result in noise nuisance and overall environmental impacts to the local community. I object on the basis that the increase in vehicles will significantly impact the air quality of the area and local villages, thus contributing negatively to the overall climate change issue. I also object on the basis that further information needs to be provided on the air quality of this area and thus a AQMA may be required. Air pollution has been proven to impact on the development of young children and with the locality very close to the school, it is imperative that this is reduced. As a result of the lockdowns over the past 18 months, it is clear that air quality and health is important and thus any activities which may hinder both should be considered carefully.
