Address	<input type="text" value="SAILTOPS, COX GREEN, COX GREEN, HORSHAM, RH12 3DE"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>I object to the planning application to create a commercial waste recycling plant for the following reasons...</p> <ul style="list-style-type: none">- This is a beautiful and tranquil greenfield used by local residents to walk, run, walk their dogs and find some peace. It is an area that provides relief and relaxation and is invaluable to the mental health of the local community. Moreover, national policy says that waste sites should be located in built-up areas or brownfield sites - this clearly is neither.- The proposed waste site does not fit into the Loxwood Neighbourhood Plan or Chichester District plan. It is not sensitive to its setting or provide any benefit to the local community.- The proposed site will have a huge negative impact on the surrounding environment and wildlife.- The increased HGV traffic on this windy country road is incredibly dangerous.- I understand that WSCC have three sites and more than 25 years of reserves, meaning national and local clay requirements are met. There is no need or demand for this site. <p>Overall, this is a site that is not required and demands needless destruction of beautiful natural habitat. This is a time when we should be doing all we can to protect the environment and our impact on it, not building on and destroying it when there is no need or benefit from it.</p>
