The change to this picturesque wood , would be criminal. As the development plan doesn't even conform to Chichester local planning or the Loxwood neighbourhood planning. The loose of this woodland with its walks and wildlife, would be such a loose to the local villages . The increase in vehicle traffic will be a severe impact to the local roads . The roads are so narrow around there , the lorry's will be cutting corners . There will be so much damage to the verge , where lorry's and cars try and miss each other . It will be just a road with lots of massive lay buys . The safety of people who walk along the side of the road won't stand a chance . The volume of traffic will cause so much damage to the roads . I ride a bike around the area and the amount of pot holes all-ready on the roads , with these heavy vehicles it's clearly only going to get worse . I strongly object to any type of planning in this area .
