Type of Comment	<input type="text" value="Objection"/>
Comments	<input type="text" value="We strongly object to this project on the basis of additional heavy traffic on the surrounding roads, damaging pollution and existing woodlands, and significant impact on wildlife in the direct and surrounding area. Extraction of clay and 'recycling' are a huge negative impact on the environment regardless of any plans to add nature spaces, these will not excuse destroying the land and wildlife in the meantime."/>
