| Comments | <p>I wish to register my objections to the development of the proposed commercial waste recycling plant and associated clay pits in Pallinghurst woods:Planning application number WSCC/030/21.</p> <p>these woods have long been used by generations of residents, both young and old, from neighbouring villages and hamlets, for healthy out door pursuits rambling, horse riding, dog walking, nature study etc. This development would have a deverstating impact on wild life and the natural environment by destroying part of the woodland and habitat of these creatures, by creating pollution and noise. In constructing a building with generators, quarrying for clay, and proposing to drive HGV vehicles into the woods would produce noise and pollution with in addition, safety issues on public rights of way. the HGV, which would need access to the site, would create an enormous safety issue to road users in that the lane which the proposed access, is a narrow country lane with listed buildings, and entrances to many public footpaths and bridle ways.</p> <p>the area is mainly agricultural and not suitable for this development. the proposed plan would be a blot on our beautiful West Sussex land scape.</p> |
