---

Loxwood Clay Pits Ltd

To Whom It May Concern,

As a local resident living in [REDACTED] I object to the above project being granted Planning Permission.

We are a rural community with poor road access that cannot withstand any increase in additional traffic.

It is bad for the environment with the volume of heavy traffic adding to increased net carbon emissions, it is also

bad for the road condition which is already in very poor condition.

All the roads around the area are not suitable for large, heavy lorries.

I have seen the effect an increase of traffic has in Knowle Lane, Cranleigh, due to all the lorries dumping their loads at the old Brick works.

Regards

James Frost
