Objection

The news is full of the precarious state of our planet and we must change our ways to protect our natural world. The negative impact of this proposal on the local ecology alone should mean the council reject this destructive and unnecessary planning application. Ancient woodland is one of our most precious natural habitats and so much has been lost or damaged in recent years and no amount of 'restoration' will ever replace what will be lost should this go ahead although I'm sure a few people will become very wealthy as a result. Also consider the increased traffic, 25 years of clay available in West Sussex without this development, 33 years of operation, threat to bridleways and foothpaths etc. Do the right thing WSCC and reject this application.
