

Comment for planning application WSCC/030/21

Application number	<input type="text" value="WSCC/030/21"/>
Name	<input type="text" value="Mrs. P. Fielder"/>
Address	<input type="text" value="GREYLINGS, CHURCH STREET, CHURCH STREET, HORSHAM, RH12 3EE"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>We already have a 25 year supply of clay according to the West Sussex Minerals plan. The brickworks the clay was to supply has closed and there is no replacement destination for the extracted clay.</p> <p>If there is no hole to fill with the debris from the recycling facility ,will this woodland become just a useful site to recycle debris from far and wide and leave the rubbish behind.</p> <p>This is a greenfield site where local people can explore and enjoy the peace and tranquility of natural woodland and all its wildlife.</p> <p>It will be destroyed by pollution, dumping, noise, diesel and light pollution.</p> <p>I feel sorry for the houses nearby and what they will suffer for 30 years.</p> <p>This site is nowhere near any accepted Lorry Route Network.</p> <p>This small winding rural road has very little pavement and virtually no lighting.</p> <p>The 42 per day Turnover of HGVs will impact on the life of the villagers when they thunder along shaking the houses and belching diesel fumes.</p> <p>It will be unsafe to walk or cycle along this road. It will be no safer for cars as a large HGV hurtles towards them on a narrow bit of road.</p> <p>The damage to the road surface and breaking down of the edges of the roads will be a constant drain on Council funds and damage people's cars.</p> <p>In winter the road will be lethal as no rural roads around here are gritted.</p> <p>Gaining access to the 281 will be difficult if not dangerous at times and I fear cause accidents.</p> <p>This disastrous planning application to destroy our area must not be allowed to go ahead.</p>
