

Comment for planning application WSCC/030/21

Application number	<input type="text" value="WSCC/030/21"/>
Name	<input type="text" value="Chris Kershaw"/>
Address	<input type="text" value="WILLETTS WAY, 10, WILLETTS WAY, BILLINGSHURST, RH14 0WW"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>I object to this proposal on various grounds,</p> <ol style="list-style-type: none">1) Environmental damage, this area has an abundance of wildlife that would be severely impacted, including four threatened priority species of bats, badgers. The loss of woodland will also cause an environmental impact and affect areas of ancient woodland. We are in the midst of a global environment emergency and this sort of development directly adds to that and goes against the governments targets for reducing pollution.2) Safety, this is a widely used area by walkers, cyclists and horse riders that would be put at risk by hundreds of lorries travelling on narrow country lanes. There are also a large number of animals such as deer in the area that would also be at risk. The roads would quickly deteriorate with the constant lorry traffic. They would also severely impact the surrounding villages and hamlets with noise and fume pollution as well as possible vibration damage to their properties.3) Demand for clay, there is already sufficient supply of clay in the area for at least the next 24 years without this additional capacity which is not needed.4) environmental pollution, the surrounding villages and hamlets would be impacted by noise, dust and pollution from the site, this would be unavoidable and severely impact local residents quality of life and several children schools, Loxwood primary and Rikkio <p>Overall this development is a bad idea, not necessary and in an unsuitable location.</p>
