Comments	<p>The unnecessary demand for clay. The impact on ancient woodland & the eco systems that this area supports. No justification for a waste site & the thought of numerous trucks travelling up & down small country roads is an accident waiting to happen. Brownfield areas need to be considered first. The impact this will have on local farming activity, when they are already struggling.</p> <p>There is really no logical reason to develop this site other than greed & misuse of a woodland that provides so much more than money to the local community & beyond.</p>
