

# Comment for planning application WSCC/030/21

Application number	<input type="text" value="WSCC/030/21"/>
Name	<input type="text" value="David Sarson"/>
Address	<input type="text" value="The Pines, Cox Green, Rudgwick, RH12 3DD"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>I object to this application for the following; 1) there is no demand for clay. there is c25 years supply in the county and local brickworks have closed without exhausting the clay available. Pitsham works does not use weald clay. generally brickworks use adjacent clay rather than the environmentally unsound practice of transporting considerable distances. (2) there is no justification for waste at this site as it is an unsuitable location. Sufficient capacity already exists in the county in more sustainable locations. (3) the proposal is only to recycle 50% - far below the current environmental standard. (4) this is unsuitable as a location. policy requires brown field not greenfield locations.(5) the workings and buildings will cause unnecessary harm to the existing woodland, environment and visual amenity. (6) there is a conflict with existing agricultural users in the vicinity. (7) public rights of way will be impacted with a loss of amenity.(8) pollutants will impact the local school and other residential properties.(9) it is outwit the relevant local plans and will create no benefit to the local community. (10) there is a very significant environmental impact to the natural environment generally, protected species, ancient woodland, the local road network, residents and users of the footpaths and bridleways. (11) traffic harm will be dramatic on narrow country lanes with residential properties adjacent the road.</p>
