Type of Comment	<input type="text" value="Objection"/>
Comments	<p>I object to this proposed clay quarry and construction materials recycling facility, for the following main reasons:</p> <ol style="list-style-type: none">1. Traffic & unsuitable infrastructure; The increase in traffic, particularly HGV vehicles will have a severely detrimental impact on the surrounding villages eg Loxwood and Rudgwick. The roads are narrow and can not cope with such an increase in volume and this nature of the traffic.2. Massively negative impact on the environment ; It will lead to a loss of wildlife and species, it will reduce the tranquility of the area, and will reduce access to local footpaths etc. It will also likely lead to an increase in carbon emissions.3. Neighbourhood plan: The proposal is in conflict with the Loxwood Neighbourhood Plan and the Chichester District Local Plan for development in a rural area. <p>The proposal will not protect the environment or bring any benefits to the local community, it will only have detrimental impacts.</p>
