Objection

I wish to register an objection to this development.

The application should be rejected on at least the following grounds:

- 1. The application documents do not make a solid case for acceptance.
- 2. There would be totally unacceptable impact on the local environment.
- 3. The proposed routes are unsuitable for the volume of HGV's, the roads would be made unsafe for other users including walkers, cyclists, and horse riders. Station Road in Loxwood is the main access to the local school and already gets congested and with more heavy volume traffic would become unsafe for children. What guarantee is there that the designated routes will be adequately maintained and adhered to. The HGV drivers could use other routes through housing areas at their convenience.
- 4. The reports submitted to date from Local Authorities departments appears to indicate that more detailed consideration is required to support and justify this application.
- 5. Reports indicate that sufficient brick making clay reserves are available locally for the foreseeable future, so, why is this development required?
- 6. The underlying prime reason for this application appears to be for the dumping of waste materials.
- 7. The adverse impact on the local villages and countryside will be increasing felt over the proposed 30 year life of this activity.
