## Comment for planning application WSCC/030/21

Application number	WSCC/030/21	
Name	William Waller	
Address	ORCHARDS, TWO WAYS, TWO WAYS, BILLINGSHURST, RH14 0SD	
Type of Comment	Objection	
Comments	There is quite simply no justification to grant planning for such a facility in an area of such beautiful and peaceful woodland. The impact on the local environment through noise pollution, the physical destruction of wildlife habitats and the loss of further trees and hedgerows alone can surely not be justified. The increased level of traffic will pose a significant safety risk to children, cyclists, dog walkers, runners and equestrians who all use the roads, footpaths and bridleways for recreation. This risk can surely not be justified when there is already a plentiful supply of clay (more than 25 years of reserves from existing sites) and there is already sufficient capacity for such waste in the locality. This plan is clearly conceived with purely financial motives at heart with the aim of creating a lucrative landfill site at the detriment of all of the local community. I hope the council will see sense in refusing this application.
