Comments	<p>I am extremely concerned about the impacts on the wildlife and woodland. We are already the most impoverished country in Europe for forests so any destruction of the little that we have must be objected to.</p> <p>It also goes without saying in the current ecological and climate emergency we find ourselves in we must protect all that we have and destruction of woodlands and green field sites must not be prioritized.</p> <p>Mining has impacts beyond this also with heavy machinery, movement of vehicles, lights and noise all which affect locals and native wildlife.</p> <p>I do hope we see that this is not an appropriate place.</p> <p>All the best</p> <p>Nicola Peel</p>
