Comments	<input type="text" value="I object to the planned destruction of broad leaved woodland for clay pit and waste site. We have more than 25 years of reserves of clay so the national and local level clay requirements are already met. There is no demand for additional brickmaking clay, hence the closure of West Hoathly brickworks. Furthermore, the proposed site is not environmentally friendly as it is not adjacent to a brick making factory. This is also an unsuitable place for a waste site. It is a GREENFIELD site and national policy states that waste sites should be in built-up areas or brownfield sites. The application is for 15,000 sq ft building in pristine woodland, having a deleterious impact on the landscape. Increased HGV traffic will have a severe impact on local villages and lead to greater pollution. It will also negatively impact local wildlife habitat and species."/>
