I strongly object to this application for the following reasons:

There is no need for any more clay in West Sussex and it is not clear where the clay will be used. Nor is there any need for another recycling facility in the area.

The removal of the clay will involve a large number of HGVs using Loxwood Road which is totally unsuitable for such traffic. It will have an effect on the safety of all who use the road: pedestrians, cyclists, horse riders and car drivers, as well as disturbing the residents of Loxwood road with the noise and dust produced.

The planned work will have a detrimental effect on the area and is totally unacceptable. It is a much loved and environmentally sensitive wooded area providing a home to many forms of wildlife as well as a peaceful place of recreation for people benefitting both their physical and mental health. There are no good reasons for approving this application as the only benefit would seem to be a financial one to the company carrying out this destruction.
