## Comment for planning application WSCC/030/21

dust would seriously spoil this environment.	Application number	WSCC/030/21		
Type of Comment Comment I am objecting for the following reasons: 1. I enjoy cycling the bridleways through and around the woods. This amenity would be seriously restricted to me with HGV's and other additional traffic. The increase in noise, pollution both light and dust would seriously spoil this environment.	Name	Ben Williams

movements	Comments	<ol> <li>I enjoy cycling the bridleways through and around the woods. This amenity would be seriously restricted to me with HGV's and other additional traffic. The increase in noise, pollution both light and dust would seriously spoil this environment.</li> <li>I am concerned that the surrounding road network will become less safe with all the additional lorry movements</li> <li>I fail to understand why these beautiful woods should be destroyed by such a selfish proposal. This has no benefit to the local community/surrounding environment or wildlife.</li> <li>We are in an climate emergency and this will destroy some of the factors such as tree canopy that help to mitigate the effects that man has created.</li> <li>There is no need for this additional clay. Several brickworks in the area have closed and not</li> </ol>
